

# Instructions Assembly – Hammock Chair

## Eyebolt Installation

Find ceiling joist (use stud finder or tap and verify with small nail). Be sure to locate the exact center. Drill a hole using a 3/16 drill bit perpendicular to ceiling. Screw in the included eyebolt/hook assembly until all threads are not visible. Do not loosen or adjust once installed.

**Hole must be directly in the center of the stud for full weight bearing capacity. Spinning or swinging could loosen and compromise the eyebolt strength.**

## Hanging Hammock Chair

Hang the Hammock Chair by the O ring onto the pre-installed eyebolt/hook.

## Washing Instructions

Scrub gently with a soft brush and a mixture of water and soap. Using a fabric protector will enhance the look of your chair longer. No machine wash.
